

NEW SIMPLICITY Z'MOW AT GAFA 2006

Simplicity lawn mowers are manufactured by Simplicity Inc. and are easy to operate with all the operator comforts. Read all about the Z'Mow of this tractor manufacturer

Zero Turn Radius Tractors – Simplicity

The Z'mow from Simplicity is one of the low cost zero turn radius tractor within the reach of everyone. With a length of only 165 cm the Z'Mow is very compact and makes it ideal for smaller European gardens. The features briefly are

- * The Z'Mow in Europe should retail around € 3500,- incl. VAT, which makes it an affordable Zero Turn
- * It can move at a speed of 9,7 KmH in the forward gear and 4,8 KmH in the reverse gear. It can operate at this speed and cut the grass evenly at this speed.
- * It incorporates a single piece frame that is tough and stable and takes riding shocks easily and without transmitting it to the driver
- * The ride is further dampened with rear pivoting carrier to give you a smooth ride, improves traction and gives you a great quality of cut with the deep profile twin bladed mower deck of 106 cm.
- * The height of cut can be continuously adjusted through a infinite height of cut lever. The lever is accessible to the operator from seat.
- * All the controls are so placed that they are available to the operator without extending hand and the seat is padded for greater operator comfort. There are twin lever controls that are within easy reach of the driver and convenient to operate
- * The metering console includes an hour meter so that the maintenance can be arranged as per time suggested by the manufacturer and then the equipment gives you a trouble free service
- * The rear tires are 18-inch diameter and this makes for a comfortable ride. The 11-inch front tires spin freely 360 degrees for quick turns and easy zero turn manoeuvrability.
- * The footrests are padded for additional driver comfort.
- * The 13 liter fuel tank gives you sufficient range so that you can continue your work without bothering for refuelling
- * The greatest advantage of this tractor is the ability to turn on a dime and that too with ease. The transmission is through Hydro Gear® EZT transmission for ease of driving and better control
- * The engine is a Briggs & Stratton 18.5 HP Intek single cylinder.

Simplicity is a member of the Briggs & Stratton Yard Power Products Group, manufactures a wide variety of outdoor equipment, lawn & garden tractors, leaf/debris products and snow removal equipment for both consumer and commercial use. Factory approved parts, accessories and maintenance items are in Europe only available at authorised dealers.
